

Alternatives North

Guidelines for Alternatives North List Service Posting

Alternatives North provides a list service as an on-line bulletin board of news and events. Messages are sent to an email list of several hundred addressees who have signed up to receive information on social justice, environmental and democratic affairs.

Any person on the distribution list can send a message to the full address list. Messages are reviewed by an editor to ensure content is appropriate. It's important to use the list service to post only important information of interest to a wide audience.

To promote the usefulness of your messages, please follow these guidelines:

1. Use plain language, and put a clear, short headline in the subject line
3. Messages should be no longer than 150 words
4. Documents cannot be attached (e.g. PDFs, photos, MS documents)
5. You can include a live link to documents posted elsewhere on-line
6. Don't include the email addresses of others without their permission
